

Statement regarding SB 2628:

“This plan closely mirrors what I introduced last September. It gives our health care providers the chance to focus on practicing medicine, rather than focus on how they’re going to pay their insurance bills. It’s good for the health care system in Mississippi and ensures our people will have access to quality health care.”

Statement regarding SB 2794:

“This is about making sure the victims of crime have the best possible district attorney’s fighting for their rights, and the best possible judges hearing the cases.”
